## SUMMARY

Frontend Developer (Fresher) with strong interest in building modern, responsive web applications using HTML, CSS, JavaScript, and React.js. Experienced in developing projects such as Weather App, Instagram Clone, E-commerce UI, and interactive banners. Eager to contribute to real-world projects, improve UI/UX quality, and grow as a professional developer.

---

## PROJECTS

### EB Bill Calculator

Developed an interactive EB Bill Calculator using HTML, CSS, and JavaScript to compute electricity charges dynamically.

### E-commerce website

Created the complete frontend UI for an e-commerce platform using HTML and CSS.

Designed product listing, cart, and checkout pages. Ensured responsive design and intuitive navigation for better UX.

### Instagram clone

Developed a frontend clone of Instagram using React and CSS Modules. Implemented features like user feed, story section, and profile layout. Practiced component-based design and responsive layouts.

### Weather App

Developed a Weather App using API integration to fetch real-time data and improve user experiences.

---
