SUMMARY

Enthusiastic Frontend Engineer (Fresher) with hands-on experience in building responsive web applications using HTML, CSS, JavaScript, and React. Created projects like a Weather App, Instagram Clone, E-commerce frontend, and interactive banners. Passionate about crafting clean, user-friendly interfaces and continuously learning new technologies.

PROJECTS

EB Bill Calculator

- Developed an interactive EB Bill Calculator using HTML, CSS, and JavaScript to compute electricity charges dynamically.

E-commerce website

- Created the complete frontend UI for an e-commerce platform using HTML and CSS.
- Designed product listing, cart, and checkout pages. Ensured responsive design and intuitive navigation for better UX.

Instagram clone

- Developed a frontend clone of Instagram using React and CSS Modules. Implemented features like user feed, story section, and profile layout. Practiced component-based design and responsive layouts.

Weather App

- Developed a Weather App using API integration to fetch real-time data and improve user experiences.
-

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering

- Mahath Amma Institution of Technology and Engineering, Anna University
2021– 2025 CGPA: 7.5

Diploma Course

- Diploma of Computer Technology
 - Venkateshwara Polytechnic
College, Kaikurichi Year of Completion: 2018
-
